-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on 30 March 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6-7, and 10-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Prasad et al. (US 4,934,148).

Claims 13 and 16-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by McClenny (US 4,982,512).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prasad. Prasad is considered to disclose the claimed invention except for the recited percentage. It would have been an obvious matter of design choice to recite a specific percentage of oxygen or nitrogen since the claimed invention would be performed by Prasad regardless of the claimed percentage.

Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prasad in view of McClenny. Prasad is considered to disclose the claimed invention except for a molecular sieve, membrane filtration, and/or cryogenically. It would have been obvious to one skilled in the art to provide the teachings of Prasad with a molecular sieve, membrane filtration, and/or cryogenically, considered disclosed in McClenny, for the purpose removing nitrogen for the purpose of raising an oxygen concentration.

Claims 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over McClenny. McClenny is considered to disclose the claimed invention except for the recited percentage. It would have been an obvious matter of design choice to recite a specific percentage of oxygen or nitrogen since the claimed invention would be performed by McClenny regardless of the claimed percentage.

Claims 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over McClenny in view of Jaynes et al. (2002/0125591). McClenny is considered to disclose the claimed invention except for a gas cleaner for cleaning. It would have been an

obvious to one skilled in the art to provide the teachings of McClenny with a gas cleaner for cleaning, considered disclosed in Jaynes, for the purpose removing purifying gas in a gas treatment system.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).
